OBJECTIVES

Motivated AI/ML engineering student with strong foundations in Python, linear algebra, calculus, statistics, and machine learning algorithms, seeking an opportunity to apply my learning to real-world AI projects

EDUCATION

K.B.P. Secondary And Technical School , Kopargaon, 06/2019

SSC

82.60%

Sanjivani K.B.P Polytechnic , Kopargaon, 2024

High School Diploma

90%

Sanivani University, Kopargaon

B.Tech

SGPA - 8.32

TECHNICAL STACK

Programming Languages

- Python (NumPy, Pandas)
- Basic knowledge of **Java** (OOP concepts)

Data Analysis & Visualization -

- Matplotlib
- Seaborn

- Power BI

- Machine Learning
- **DeepLearning-**
Neural Networks (Basic)
- Database-
MySQL
- **Generative AI & Tools**
Understanding of **LLMs**
Prompt Engineering (basic)
AI Automation Agents

PROJECTS

1. AI-Driven Export Intelligence & Decision Support Platform

Designed an AI-powered platform to assist exporters in product classification, HS code identification, Buyer Finding and market feasibility analysis.

2. AI-Assisted Digital Will & Legal Document Automation System

Developed an AI-assisted system to guide users through structured legal document creation
Focused on data security, user verification, and automated document generation workflow

3. AI-Based Demand Forecasting & Sales Prediction System

Developed a machine learning model to forecast future product demand using historical sales data
Generated accurate sales predictions to support data-driven business planning and inventory optimization
