PROFESSIONAL SUMMARY

Analytical and self-driven Computer Science Engineering student (7.05+ CGPA) with an entrepreneurial passion for transforming complex datasets into actionable insights. Possesses a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, combined with expertise in statistical learning (Random Forest) and predictive data modeling. Highly adept at diagnosing data anomalies, interpreting trends, and formulating data-driven action plans to resolve real-world problems in fast-paced, results-oriented environments. Excellent interpersonal and data visualization skills.

EDUCATION

Sanjivani University
Bachelor of Technology in Computer Science Engineering (Current CGPA: 6.95/10)

Kopargaon, India
Aug. 2024 – May 2028

Sanjivani K.B.P Polytechnic
Diploma in Computer Science Engineering (Final CGPA: 8.03/10)

Kopargaon, India
Aug. 2021 – May 2024

TECHNICAL SKILLS

- Data Analytics & Modeling: Exploratory Data Analysis (EDA), Statistical Modeling, Random Forest, Predictive Analytics, NLP
- Languages & Core CS: Python (Pandas, NumPy, Scikit-learn), Java (OOPs), SQL (PostgreSQL, MySQL), Data Structures (DSA)
- Visualization & Dashboards: Grafana, Multi-dimensional Data Visualization, Interactive Dashboards
- AI & Automation: Agentic AI (LangChain, CrewAI), RAG Pipelines, Vector Databases (Pinecone), MQTT, REST APIs, n8n
- Cloud & Tools: Git/GitHub, AWS (Foundational), Docker, Postman, Excel (Advanced)

DATA ANALYTICS & ENGINEERING PROJECTS

NPK Soil Analysis (IoT & Predictive Analytics)

Lead Data & Hardware Architect

- Engineered an end-to-end IoT monitoring data pipeline using ESP32 sensors and NPK probes to capture real-time agricultural metrics.
- Implemented a Random Forest model to evaluate multi-dimensional soil health data, accurately forecasting nutrient trends.
- Designed interactive Grafana dashboards to interpret complex historical data and automatically formulate targeted fertilizer action plans.

AI-Powered Resume Intelligence

NLP Engine & Selection Optimization

- Developed a text-analytics engine using NLP and custom weighted-scoring algorithms to map skill profiles against market demand trends.
- Engineered explainable metrics to diagnose qualification discrepancies, translating unstructured text into data-driven career suggestions.
- Recognized as a National Semi-Finalist at NextWave Buildathon for achieving transparency in career intelligence ranking engines.

AI-Driven Voice Calling Automation

Workflow Optimization & Telemetry Analytics

- Built an autonomous conversational backend utilizing Vapi and ChatGPT APIs to handle high-frequency interactions.
- Monitored and analyzed conversational latency logs to diagnose performance bottlenecks, lowering interaction delays.
- Created clean data preprocessing layers to capture, clean, and structure unstructured lead qualification data for CRM pipelines.

PROFESSIONAL EXPERIENCE

HCLTech

Pune, India

Web Developer Intern (Data & Component Integration)

Jun. 2025 – Oct. 2025

- Developed robust components using React 19 and analyzed web application traffic patterns to optimize layout performance.
- Used data-driven tracking to diagnose cross-browser compatibility issues, writing effective code adjustments to increase rendering speeds.

BeyonDegree Consultancy

Pune, India

Software Engineering Intern (Database & Systems)

Jun. 2022 – Sep. 2022

- Managed relational database operations using SQL and Java backends, ensuring system reliability and optimal execution speeds.
- Performed database query optimization and schema analysis to resolve data retrieval lags, improving data availability.

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH): Regional Level Qualifier (Round 2) for engineering a data-driven AI prototype.
- Oracle Academy Certifications: AI & Machine Learning in Java | Java Fundamentals.
- AWS Cloud Practitioner Essentials: Completed Amazon Web Services core cloud operations and data architecture fundamentals.
