PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience in Machine Learning, Data Analytics, and IoT-based intelligent systems. Skilled in Python, SQL, TensorFlow, Power BI, and SAP ABAP. SAP Certified ABAP Developer with strong analytical and problem-solving abilities, practical project experience, and a research publication in Machine Learning. Seeking an opportunity to apply technical skills and contribute to innovative real-world solutions.

EDUCATION

B.Tech in Artificial Intelligence & Data Science <i>Sanjivani University, Kopergaon</i>	2024 – 2027 CGPA: 7.28
Diploma in Electrical Engineering <i>Sanjivani K.B.P Polytechnic, Kopergaon</i>	2021 – 2024 76.93%
SSC (10th Standard) <i>Seva Niketan Convent School</i>	2020 – 2021 79.20%

TECHNICAL SKILLS

Programming	Python, ABAP
Machine Learning	Supervised Learning, Classification, Regression, Feature Engineering
Deep Learning	CNN, TensorFlow, Keras, Image Processing, Data Augmentation
Data Analytics	Pandas, NumPy, EDA, Statistical Analysis
Business Intelligence	Power BI, Dashboard Design, Data Visualization
Databases	MySQL, SAP Data Dictionary
IoT & Embedded	ESP32, Sensor Integration, Real-Time Automation
Tools & Platforms	Git, GitHub, Jupyter Notebook, Excel, SPSS, Apache Spark
Cloud & DevOps	IBM Cloud Fundamentals, DevOps Fundamentals

INTERNSHIP EXPERIENCE

Machine Learning Intern <i>Ascentz Technology — Remote</i>	Aug 2025
- Developed supervised Machine Learning models using Python and Scikit-learn on real-world datasets. - Performed data cleaning, preprocessing, and feature engineering to improve model accuracy. - Applied classification algorithms and evaluated performance using accuracy, precision, and recall metrics. - Extracted actionable insights through data analysis and visualization techniques.	

PROJECTS

Pneumonia Detection Using CNN	<i>Python — TensorFlow — Deep Learning</i>
- Built a CNN model to classify chest X-ray images as Normal or Pneumonia with 94% accuracy. - Applied image preprocessing, normalization, and data augmentation to reduce overfitting. - Evaluated performance using confusion matrix, accuracy, and validation metrics.	
IoT-Based Smart Cooking System	<i>ESP32 — Sensors — Automation</i>
- Designed an automated kitchen safety system for gas leakage, cooker whistle, and milk boiling detection. - Achieved real-time alert response within 3 seconds using sensor-based automation logic. - Implemented instant notification alerts for enhanced household safety.	
IoT Farm Monitoring System	<i>ESP32 — Sensors — Blynk</i>
- Monitored soil moisture, humidity, and temperature using IoT sensors connected to ESP32. - Automated irrigation scheduling through Blynk platform using real-time sensor data. - Reduced unnecessary water usage by approximately 30% through smart irrigation control.	

CERTIFICATIONS

- SAP Certified ABAP Developer — SAP Global Certification

- Salesforce Certified Advanced Administrator (Agentforce Specialist)
- IBM Career Education Program — Business Intelligence, Cloud Fundamentals, DevOps, SPSS Statistics, Apache Spark & Scala

ACHIEVEMENTS & RESEARCH

- Published research paper on “Predicting Insurance Claim Amounts Using Machine Learning” in IRJMRS (2025).
- Presented research at the International Conference on Sustainable Innovations in Engineering, Science and Management (SIESM-2026).
- Secured Second Place in Ignite Startup Pitching Competition at Sanjivani University (2026).
