CAREER OBJECTIVE

Aspiring AIML engineer skilled in Python, ML, and API integration, passionate about building secure, AI-driven solutions that empower users and protect data privacy. Strong problem-solving and collaboration skills with a focus on innovation and realworld impact.

TECHNICAL SKILLS

Languages: Python, Java, C.

Web Tech: HTML5, CSS3, React, Node.js.

Frameworks & Libraries: Flask, TensorFlow , OpenCV , Scikit-Learn.

Tools & Platforms: Git, Github, VS Code, IBM SPSS, IBM Watsonx Studio, Google Colab, Power BI.

AI Tools & Utilities: Bolt, Lovable, Cursor, Windsurf, Trae AI, Google NotebookLM.

Automation & Data : n8n , Make.com, Clay.

EDUCATION

Bachelor of Technology - CSE With AIML Specialization	CGPA: 7.07/10	2024 - 2027
Sanjivani University, Kopergaon		
Diploma in Mechatronics Engineering	Percentage: 73.11%	2021 - 2024
Sanjivani K.B.P Polytechnic, Kopergaon		2020 - 2021
SSC - Maharashtra Board	Percentage: 67.60%	Renavikar
Madhymic Vidhlay, Ahilynagar		

PROJECTS

AI Virtual Styler

- Developed an AI-based virtual styling system that recommends outfits using facial features, color analysis, and body measurements.
- Integrated machine learning models to identify patterns and provide automated fashion suggestions.
- Technologies Used:** Python, OpenCV, TensorFlow, Flask, HTML, CSS
- Applications:**
 - Personalized styling assistants
 - E-commerce virtual try-on systems

Shorten Your Long URLs with QR

- Created a platform to shorten long URLs and generate QR codes instantly.
- Integrated secure link processing to ensure safe URL handling.
- Added minimalistic UI with fast user experience.
- Implemented error handling for invalid or restricted URLs.
- Technologies Used:** HTML, CSS, JavaScript, Flask, qrcode library
- Applications:**
 - Social media sharing, marketing
 - events & ticketing

Flame Detection and Alert System for Car

- Developed a flame detection unit using infrared sensors for inside-vehicle safety.
- Added alert mechanism for immediate notification and preventive action.
- Calibrated sensor sensitivity to reduce false alarms.
- Built prototype with stable power and compact wiring layout
- Technologies Used:** Flame Sensor, Arduino, GSM/Alert Module, Embedded C
- Applications:**
 - Vehicle safety systems,

- ✦ smart fire-alert solution

Maze Solving Robot

- Designed and developed an autonomous robot capable of solving mazes using real-time sensor-based path detection and decision-making algorithms.
- Implemented left-hand and right-hand rule maze-solving techniques for efficient navigation through complex paths.
- Integrated IR sensors for accurate wall detection and movement correction during traversal.
- Built a lightweight and stable chassis to enhance mobility and reduce vibration during pathfinding.
- **Technologies Used:** Arduino, IR Sensors, DC Motors, Embedded C
- **Applications:**
 - ✦ Autonomous navigation concepts and research
 - ✦ Prototyping for intelligent mobile robots

Lightweight Real-Time Footfall Counting System

- Developed a real-time people counting system using computer vision techniques.
- Implemented YOLOv8 for accurate person detection in live video streams.
- Designed a centroid tracking algorithm to assign unique IDs and track individuals.
- Optimized the system to run efficiently on CPU without requiring GPU support.
- Achieved approximately 95% counting accuracy with real-time performance.
- **Technologies Used :** Python, OpenCV, YOLOv8 (Ultralytics), NumPy
- **Applications :**
 - ✦ Smart surveillance systems
 - ✦ Retail analytics and customer behaviour tracking
 - ✦ Crowd monitoring in public places

EXPERIENCE

DURA AUTO India PVT. LTD

Dec 2023 – March 2024

- Gained hands-on experience in production line processes and automotive component manufacturing.
- Learned industry-standard tools, safety practices, and lean manufacturing principles.

Dialogues Media – Web Development Intern

Jul 2025 – Aug 2025

- Contributed to building and improving the **official company website**, ensuring responsiveness and modern UI/UX standards.
- Collaborated with the content and creative teams to convert design concepts into functional web components. • Integrated front-end elements with backend APIs to deliver dynamic and interactive user experiences.

CERTIFICATION

★ Cloud Fundamentals

★ Predictive Modeling with IBM SPSS Modeler

★ IBM Watson Studio

Introducing Generative AI with AWS

Issued by IBM Career Education Program

Issued by IBM Career Education Program

Issued by IBM Career Education Program ★

Udacity

CO-CURRICULAR ACTIVITY

Participated in **AgriScan Hackathon, Pune** — A national-level innovation competition focused on agriculture-based problem solving.

Participated in **InnoHack 2.0**, VIT College — Showcased technical skills through real-time problem-solving and team-based innovation challenges.

Participated in **SATWA 2025 – 36 Hours National-Level Hackathon** — Engaged in long-duration coding, rapid prototyping, and solution development with multidisciplinary teams.

Published paper on “**Lightweight Real-Time Footfall Counting System**” at an international conference, Sanjivani University.

Winner of the conference presentation. Link : https://ijsret.com/wp-content/uploads/IJSRET_V12_issue1_198.pdf

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge. I am confident that if given an opportunity, I will deliver my best and contribute positively to the growth of your organization.
