

NISHIKANT MADHUKAR YEOLE

Kopargaon, Maharashtra

☎ +91 8766916453 ✉ nishikantyeole123@gmail.com in LinkedIn 🐙 GitHub

Profile

- Entry-level Data Scientist and Machine Learning Engineer with strong hands-on experience in Python and SQL. Skilled in data preprocessing, exploratory data analysis, feature engineering, and end-to-end machine learning pipelines. Experienced in deep learning, computer vision, and NLP through real-world projects.

Education

- **Sanjivani University** 2024 – 2027
B.Tech – Artificial Intelligence & Data Science (CGPA: 8.22)
- **Sanjivani K.B.P Polytechnic** 2022 – 2024
Diploma – Computer Technology (85%)

Internship

- **Ethara AI** Feb 2026 – May 2026
LLM Training Intern Paid
 - Contributed to AI and data projects supporting Large Language Model (LLM) post-training workflows.
 - Performed AI data preparation, annotation, evaluation, and quality assurance tasks to improve model performance and reliability.
 - Gained practical exposure to real-world AI workflow execution and LLM development pipelines.
- **TechnoHack (Remote)** Jan 2025 – Feb 2025
Data Scientist & Machine Learning Intern
 - Performed data cleaning, preprocessing, and exploratory data analysis on structured datasets.
 - Built and evaluated machine learning models using Scikit-learn.
 - Created interactive Power BI dashboards for business insights.
- **Thought Bliss Solution, Pune** Mar 2023 – Apr 2023
Python Intern (AI & Data Processing)
 - Developed Python scripts for automation, data analysis, and AI-based workflows.
 - Supported machine learning prototype development.

Projects

- **Medical Report Simplifier (NLP)**
Python, NLP
 - Built an end-to-end NLP pipeline to convert complex medical reports into simplified, patient-friendly summaries.
 - Applied text preprocessing, keyword extraction, and multilingual translation to improve accessibility.
- **Brain Tumor Detection & Classification (CNN)**
TensorFlow, Keras, CNN
 - Developed a CNN-based deep learning model to classify MRI brain images into four tumor categories.
 - Used image preprocessing, data augmentation, and hyperparameter tuning to improve accuracy.
- **Cattle & Buffalo Breed Classification**
Computer Vision, Transfer Learning
 - Implemented a transfer learning-based CNN model for automated breed identification from images.
 - Fine-tuned pre-trained models and evaluated performance using accuracy and confusion matrix.
- **IoT-Based Smart Dustbin**
IoT, Sensors
 - Designed an IoT solution using sensors for waste level detection and real-time alert generation.
 - Enabled sensor data collection for basic analytics to support efficient waste management.

Technical Skills

- **Programming Languages:** Python, SQL
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Supervised & Unsupervised Learning
- **Deep Learning:** TensorFlow, Keras, PyTorch, CNNs, Transfer Learning
- **Data Science:** Pandas, NumPy, EDA, Feature Engineering, Statistical Analysis
- **NLP & Computer Vision:** Text Preprocessing, Keyword Extraction, Multilingual NLP, Image Preprocessing
- **Tools & Platforms:** Power BI, Git, GitHub, Streamlit
- **Databases & Cloud:** MySQL, MongoDB, AWS (Basics), Docker (Basics), Jenkins (Basics)

Achievements & Activities

- **Supernova Stellar Hackathon track** Feb 2026
MGMU School of Engineering and Technology, *Chhatrapati Sambhaji Nagar*
 - Team Robobin secured the First Runner-Up Prize in the Stellar Hackathon track and winning a trophy .
