PROFESSIONAL SUMMARY

Artificial Intelligence & Data Science undergraduate with experience in machine learning, predictive analytics, explainable AI, and data-driven problem solving. Skilled in Python, SQL, statistical analysis, feature engineering, and model evaluation.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Sanjivani University

2024 - Present

Diploma in Mechatronics Engineering

CGPA: **8.23 / 10**

Sanjivani KBP Polytechnic

2021 - 2024

85.04%

TECHNICAL SKILLS

Programming: Python, SQL, Java

Machine Learning: Scikit-learn, XGBoost, Random Forest, Logistic Regression, Classification, Regression, Feature Engineering, Hyperparameter Tuning, Cross-Validation, Model Evaluation

Data Science: Predictive Modeling, Statistical Analysis, Business Analytics, Customer Analytics, Credit Risk Modeling, Causal Inference, Uplift Modeling, Data Mining, Statistical Modeling

Explainable AI: SHAP, Grad-CAM

Deep Learning: TensorFlow, Keras, PyTorch, CNNs, Transfer Learning

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn **Tools:** Git, Jupyter Notebook, Google Colab

INTERNSHIPS

AI & Data Analytics Intern | Shell Skills4Future × Edunet Foundation

Jul 2025 – Aug 2025

- Performed EDA and data cleaning on operational datasets to surface business insights supporting sustainability and energy analytics workflows
- Built machine learning models for pattern recognition in business data; automated preprocessing pipelines using Pandas and NumPy, reducing manual data preparation effort
- Visualized analytical findings using Matplotlib and Seaborn; communicated insights and recommendations to cross-functional stakeholders

AI & Cloud Intern | IBM SkillsBuild × Edunet Foundation

Jun 2025 – Aug 2025

- Developed classification models using IBM AutoAI on IBM Cloud, applying automated feature engineering, hyperparameter tuning, and cross-validation to benchmark ML algorithms
- Evaluated model performance using ROC-AUC, precision-recall, and confusion matrix metrics to validate and select optimal models for deployment scenarios
- Designed cloud-based ML workflows on IBM Cloud infrastructure, gaining experience with end-to-end AI solution deployment and model lifecycle management

PROJECTS

Customer Churn Prediction - Telecom Retention Modeling

- Built churn prediction model on 7,043 customers achieving 0.84 ROC-AUC using XGBoost and feature engineering.
- Applied SHAP explainability and developed retention prioritization framework to support business decision-making.

Loan Default Prediction – Credit Risk Modeling

- Developed credit risk model using XGBoost with financial feature engineering and imbalanced data handling.
- Applied SHAP explainability and evaluated borrower risk profiles using ROC-AUC and precision-recall metrics.

Uplift Modeling – Marketing Campaign Optimization

- Built T-Learner and S-Learner causal models on 42,693 customers to identify Persuadables and Sleeping Dogs.
- Reduced campaign targeting by **92.8%** while preserving incremental conversions using Qini-based uplift evaluation.

Deep Learning-Based Cancer Detection System using Capsule Endoscopy Images

- Developed CNN-based medical image classification pipeline on the Kvasir V2 dataset with Grad-CAM explainability.
- Research paper **presented at SIESM-2026** (1st International Conference on Sustainable Innovations in Engineering, Science & Management, Sanjivani University); project registered under **Intellectual Property Copyright**

ACHIEVEMENTS

First Runner-Up - Ignite Startup Pitching Competition, Sanjivani university • **Finalist** - CaseCon Infotsav'25, ABV-IIITM, Gwalior

- Exhibitor** - Bharat Bodhan AI Conclave, New Delhi

CERTIFICATIONS

Predictive Modeling with IBM SPSS Modeler (IBM) • NPTEL Python for Data Science - IIT Madras • Data Visualization with Python (IBM) • Advanced Classification using Machine Learning in Healthcare (IBM) • Big Data Technologies: Spark & Scala Fundamentals (IBM) • GenAI Powered Data Analytics Job Simulation (TATA x Forage) • Data Analytics Job Simulation (Deloitte)
