

Professional Summary

Motivated Computer Science student with a strong interest in Artificial Intelligence, Machine Learning, and Full Stack Development. Skilled in Python and experienced in building projects using FastAPI, REST APIs, and data-driven solutions. Passionate about applying technical skills to develop practical, efficient, and innovative software systems.

Skills

- **Programming Languages:** Python, C, C++, SQL
- **Machine Learning & Artificial Intelligence:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, Large Language Models (LLMs), Prompt Engineering, AI Automation
- **Frameworks & Libraries:** TensorFlow, Keras, Scikit-learn, OpenCV, MediaPipe, Librosa, Hugging Face
- **Data Analytics & Visualization:** Pandas, NumPy, Matplotlib, Power BI
- **Cloud Computing:** AWS Fundamentals, Microsoft Azure Fundamentals, IBM Cloud Fundamentals
- **Big Data Technologies:** Apache Spark, Scala (Basics)
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** VS Code, Jupyter Notebook, PyCharm, Git, GitHub

Experience

LLM Intern | Ethara.ai | Jan 2026 – May 2026

- Worked on Large Language Model (LLM) based applications, focusing on prompt engineering and response optimization.
- Assisted in developing AI-powered features using APIs and frameworks for text generation, summarization, and question answering.
- Performed data preprocessing and evaluation of model outputs to improve accuracy, relevance, and consistency.
- Collaborated with the development team to integrate LLM capabilities into backend systems using Python and REST APIs. Explored techniques like fine-tuning, retrieval-augmented generation (RAG), and embedding-based search for improving model performance.

Projects

AI-Powered Resume Screening System

- Built an NLP-based system to analyze and rank resumes based on job relevance.
- Developed backend using Python and FastAPI for resume processing and scoring.
- Used text preprocessing and embedding-based similarity matching for candidate evaluation.

Generative AI Chatbot using LLMs

- Developed an LLM-powered chatbot for contextual Q&A and text generation.
- Applied prompt engineering to improve response accuracy and relevance.
- Integrated API-based LLMs for real-time conversational interaction.

Certifications

- **NPTEL** - Learning Analytics Tools.
- **IBM** – Devops Fundamentals, Cloud Fundamentals, Business Intelligence, Predictive Modelling with IBM SPSS Modeller, Spark and Scala Fundamentals.
- **Machine Learning using Python** – Simplilearn: Completed an online training program covering supervised and unsupervised learning, model evaluation, and Python-based data analysis.

Education

- Bachelor of Technology (AI-Data Science) | Sanjivani University, Kopargoan, Maharashtra (CGPA: 7.84)
- Diploma in Computer Science | Sanjivani K.B.P Polytechnic, Kopargoan, Maharashtra (Grade: 84%) | June 2021 – July 2024
