PROFESSIONAL SUMMARY

AI Engineer with hands-on experience designing and deploying Generative AI and Agentic AI solutions using LangChain, LangGraph, and API-driven workflows. Skilled in building multi-agent systems, implementing RAG pipelines, and integrating AI guardrails to ensure reliable and safe outputs. Experienced in deploying scalable AI applications using FastAPI and cloud platforms, with a strong focus on monitoring performance and resolving issues such as hallucinations and workflow failures. Passionate about building production-ready AI systems that solve real-world problems.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning

Sanjivani University, Kopergaon

09/2024 – Present (Expected 2027)

Diploma in Computer Technology

SNJB's SHHJB Polytechnic, Chandwad

06/2020 – 06/2023

TECHNICAL SKILLS

- **Programming Languages:** Python, Java.
 - **Core Concepts:** APIs, Webhooks, JSON.
 - **Cloud & Platforms:** IBM Cloud, Watsonx.ai Studio.
 - **Databases:** SQL
 - **Agentic AI & Automation:** GenAI, RAG, LLM-based Systems, Prompt Engineering, AI Agents, LangChain, Transformer Models, MCP (Model Context Protocol).
 - **Tools & Platforms:** n8n, Streamlit, Groq, Pandas, NumPy.
-

INTERNSHIP EXPERIENCE

AI & Cloud Intern – IBM SkillsBuild (Virtual Internship)

Edunet Foundation & AICTE | Jul 2025 – Aug 2025.

- Worked on IBM Cloud and Watsonx.ai services.
- Built and evaluated ML models and AI agents.
- Gained hands-on experience in prompt engineering and RAG-based solutions.

Generative AI Intern – Google Cloud (Virtual Internship)

NASSCOM | Jul 2025 – Aug 2025

- Learned fundamentals of Generative AI and LLMs.
- Applied prompt engineering techniques for AI use cases.
- Learned basic Machine Learning concepts used in AI systems.
- Understood how ML models support Generative AI applications.

Post LLM-training Intern (Remote)

Ethera-ai | Jan 2026 – March 2026

- Evaluated and improved LLM outputs through structured EVALS and Generalist tasks.
 - Conducted instruction-following, factuality, and quality assessments.
 - Generated audit-ready justifications to enhance AI response accuracy and reliability.
-

PROJECTS

AI Agent for Sanjivani University

- Designed and deployed an event-driven WhatsApp automation system using n8n, utilizing webhook triggers to handle real-time incoming messages via Twilio API
- Built multi-step workflow pipelines integrating ChatGPT (LLM) and Google Search APIs to generate accurate, context-aware responses
- Implemented conditional logic and JSON-based data routing within n8n to manage diverse user queries (admissions, courses, fees, campus info)
- Automated end-to-end query handling, significantly reducing manual query handling by 80% and improving response time from minutes to seconds for students and parents

Agentic AI-Driven Multi-Agent Framework for Financial Data Analysis

- Architected a multi-agent Re-Act workflow using LangChain and Groq LLM (LLaMA 3) to orchestrate specialized AI agents for automated financial decision-making
- Engineered the data pipeline in Python using the yFinance API, Pandas, and NumPy to ingest real-time data and calculate risk/valuation metrics
- Deployed an end-to-end application on Streamlit Cloud, featuring interactive Plotly/Matplotlib visualizations and dynamic PDF report generation via ReportLab

AI Agent for Smart Farming Advice (Watsonx.ai, RAG)

- Built an AI-powered farming assistant using RAG to deliver real-time, localized agricultural advice
 - Integrated weather, soil, and market data for context-aware crop recommendations
 - Developed REST APIs (FastAPI/Flask) and implemented a RAG pipeline using IBM Granite for accurate responses
 - Enabled multilingual interaction and deployed on IBM Cloud (Watson Studio, Cloud Functions) for scalable access
-
