

Sai Udawant

AIML Engineer

+91 8010286599 - saiudawant2@gmail.com - [linkedin.com/in/sai-udawant](https://www.linkedin.com/in/sai-udawant) - Kopargaon, India

EDUCATION

Sanjivani University

B.Tech in CSE (AIML) – CGPA: 6.34 (2nd Year)

Kopargaon, India

2024 - 2027

Sanjivani K. B. P. Polytechnic

Diploma in CSE – Percentage: 73.00%

Kopargaon, India

2021 - 2024

TECHNICAL SKILLS

Languages & Database: Java, Python, C, HTML, CSS, JavaScript, MySQL

Hardware: ESP32, Arduino

Tools & Analytics: Git, GitHub, Power BI, SPSS

EXPERIENCE

AI & Cloud Intern

Remote

Edunet Foundation (AICTE & IBM SkillsBuild)

Jul 2025 – Aug 2025

- Selected for a 4-week internship leveraging IBM Cloud Platform and SkillsBuild to learn Emerging Technologies in AI & Cloud.
- Executed hands-on experiments involving Data Analytics, Auto AI, and Chatbot creation on the IBM Cloud architecture.
- Developed a project-based solution to a real-world problem and completed specialized learning plans on the IBM SkillsBuild platform.

PROJECTS

- **AI-Powered Resume-Job Description Analyzer** Oct 2025
Developed an intelligent tool using Natural Language Processing (NLP) to extract key skills and score resume relevance against job descriptions. Implemented semantic similarity algorithms to optimize resumes for Applicant Tracking Systems (ATS).
- **AI-Powered Mental Health Companion** Sep 2025
Created an AI model to detect indicators of stress, anxiety, and depression by analyzing user inputs. Implemented a dual-input system using NLP for text sentiment analysis and speech recognition for vocal tone analysis.
- **Collaborative Note-Taking Platform (NoteHive)** Mar 2025
Built a full-stack web application (PHP, MySQL, JS) to streamline academic collaboration. Engineered secure user authentication, dynamic note management, and a dedicated resource-sharing portal.
- **Smart Solar Tracking System** Jun 2024
Designed a dual-axis solar tracking system using ESP32 and LDR sensors to maximize energy capture. Integrated servo motors for real-time orientation adjustments and wireless connectivity for remote monitoring via cloud.
- **Bike Start Using Fingerprint Sensor** Feb 2024
Integrated a fingerprint sensor with a bike ignition system using a microcontroller to enhance security, ensuring only authorized users can activate the ignition.
