

Priyanka Kanade

AI/ML Enthusiast — Python Developer — Computer Engineering Student

Kopargaon, Maharashtra, India

+91 8888310629 — priyankakanade04@gmail.com

[LinkedIn Profile](#) — [GitHub Profile](#)

Professional Summary

AI and Machine Learning enthusiast pursuing a B.Tech in Computer Engineering with hands-on experience in LLM evaluation, machine learning, Python development, and intelligent web applications. Skilled in developing AI-driven solutions, data analysis and Java programming. Passionate about leveraging artificial intelligence and software engineering principles to solve real-world challenges.

Technical Skills

Programming Languages: Python, Core Java, JavaScript, SQL

Machine Learning & AI: Machine Learning, Artificial Intelligence, Deep Learning, LLM Evaluation, Prompt Engineering, Data Analysis

Data Analytics & Visualization: Power BI, Microsoft Excel, Data Visualization

Tools: Git, GitHub, VS Code, IBM Watson Studio, SPSS Modeler

Databases: MySQL

Experience

LLM Post Training Intern

Feb 2026 – May 2026

Ethara.ai, New Delhi

- Evaluated AI-generated text and image outputs to improve model accuracy and relevance.
- Performed quality assessments on LLM responses using predefined evaluation guidelines.

Developer

Jan 2025 – Jul 2025

Twinsistech (Remote)

- Maintained responsive web applications and dashboard systems.
- Assisted in debugging, testing, and performance optimization.

Python Developer Intern

Jun 2024 – Jul 2024

Tech King

- Developed Python-based automation and data analysis applications.
- Improved coding practices through real-world software development tasks.

Projects

Crop Disease Detection using Machine Learning

- Developed an AI-powered crop disease detection system using image processing and machine learning techniques.
- Trained machine learning models to identify plant diseases from leaf images.
- Implemented data preprocessing, feature extraction, and classification workflows.
- Designed the application to support farmers in early disease identification and crop protection.
- Technologies Used: Python, Machine Learning, NumPy, OpenCV.

AgroBot – AI Powered Agriculture Assistant

- Built an intelligent agriculture assistant chatbot for providing farming guidance and crop-related support.
- Integrated AI-based query handling for irrigation, fertilizers, crop management, and farming recommendations.
- Developed responsive user interfaces for smooth user interaction.

- Enhanced farmer decision-making through automated agricultural assistance.
- Technologies Used: Python, AI, HTML, CSS, JavaScript.

AI Vartul Styler

- Developed an AI-based styling and recommendation platform using modern web technologies.
- Implemented intelligent suggestion features to improve personalization and user engagement.
- Designed responsive frontend interfaces and optimized application performance.
- Applied AI-driven logic to improve recommendation quality and user experience.
- Technologies Used: Python, JavaScript, React.js, Machine Learning.

Education

Bachelor of Technology in Computer Engineering Sanjivani University, Maharashtra CGPA: 7.77/10	Expected 2027
Diploma in Computer Engineering Sanjivani K.B.P. Polytechnic Percentage: 78.12%	2024

Relevant Coursework

Machine Learning, Artificial Intelligence, Object-Oriented Programming, Database Management Systems

Certifications

- Academic Process Mining Fundamentals – Celonis
- IBM Cloud Fundamentals
- IBM DevOps Fundamentals
- IBM Watson Studio
- Predictive Modeling with IBM SPSS Modeler
- Core Java Certification
- Advanced English – Saylor Academy
