PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence and Machine Learning Engineer with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Generative AI, and Large Language Models (LLMs). Skilled in developing AI-powered applications using Python, TensorFlow, OpenCV, Scikit-learn, and REST APIs. Experienced in building intelligent systems and automating AI workflows through internships and real-world projects.

EDUCATION

Bachelor of Technology [CSE–AIML Specialization] | Sanjivani University | 2024–2027 | CGPA: 8.13/10
Diploma in Computer Science Engineering | Sanjivani K.B.P Polytechnic | 2021 – 2024 | 81.60%

TECHNICAL SKILLS

- Programming: Python, C, C++, Java, Javascript, SQL, React.js
- AI/ML: Machine Learning, Deep Learning, Computer Vision, Computer Networking, Generative AI, NLP, LLM Basics
- Frameworks: Tensor Flow, Keras, Scikit-learn, Pandas, NumPy, OpenCV
- Tools: Git, Jupyter Notebook, Github, Google Colab, Linux, VSCode
- Web: HTML, CSS3
- Core Concepts: OOP, DBMS, Data Structures, Data Science, Problem Solving

PROJECTS

Maze Solving Robot Using ESP32

- Designed and developed an autonomous maze-solving robot using ESP32, sensors, and motor control mechanisms.
- Implemented obstacle detection and path optimization techniques to enable efficient navigation through maze environments.

Pandharpur Vitthal-Rukmini Trust Website

- Developed a responsive and user-friendly website to provide devotees with easy access to temple information, services, event updates, and online facilities.
- Designed and implemented an efficient web solution that enhanced digital engagement and improved accessibility across multiple devices.

Crop Disease Detection Using Machine Learning

- Developed a machine learning-based system to identify and classify crop diseases from plant images, enabling early detection and timely intervention.
- Trained and evaluated predictive models using image processing and classification techniques to improve disease detection accuracy and support smart farming practices.

OpenCV & Deep Learning : Real-Time Footfall Counting System Using OpenCV and DL for Intelligent Crowd Monitoring

- Developed a Real-Time Footfall Counting System using OpenCV and Deep Learning to detect, track, and count people for intelligent crowd monitoring and analytics.

INTERNSHIP EXPERIENCE

LLM Post Intern | Ethara AI | Feb 2026 – May 2026

- Worked on AI data annotation and dataset preparation to support the training and optimization of machine learning models.
- Performed data labeling and quality assurance tasks while gaining hands-on experience with Large Language Models (LLMs) and AI development workflows.

Internz learn Data Science Intern - Pune |August 2025–Sep 2025

- Applied data science and machine learning techniques to analyze datasets, extract insights, and support data-driven decision-making.
- Worked with Python, data preprocessing, and visualization tools to develop predictive models and improve analytical outcomes.

Tech King Solution Webdevelopment & Python | June 2023 – July 2023

- Assisted in PCB testing, microcontroller circuits, and IoT prototyping.

CERTIFICATIONS

- IBM Cloud Fundamentals
- IBM Watson Studio using Machine Learning & Deep Learning Fundamentals
- IBM DevOps Fundamentals
- AWS Certificate
- Predictive Modeling with IBM SPSS Modeler
- Salesforce and Oracle Badge completed
- Generative AI Fundamentals – Future Skills Prime
- MSME Certificate
- Google Cloud Skill Boost

AWARDS

Best Paper Award – “Real-Time Footfall Counting System Using OpenCV and Deep Learning for Intelligent Crowd Monitoring”

1st International Conference on Sustainable Innovations in Engineering, Science and Management, Sanjivani University, 2026
