Projects

Restaurant Management System

Tech Stack: Node.js,React.js,Express.js,Styled-component

- A full-stack Point of Sale (POS) platform that enables businesses to efficiently process sales, manage orders, handle payments, and streamline end-to-end restaurant operations—including billing, inventory, kitchen workflows, and real-time analytics—through a secure, role-based system.

Inventory Management System

Tech Stack: Spring boot,React,MongoDB

- Developed a full-stack system for managing inventory, tracking stock levels, and processing orders with role-based access.

AI-Based Contract Management System

Tech Stack: Python (Flask), NLP (spaCy), Transformers, Hugging Face, PyPDF2, REST APIs

- An AI-powered system that automates contract analysis by extracting text, summarizing documents, identifying clauses, and assessing compliance and risk using NLP and large language models.

Mini Projects and Contributions
