PROFESSIONAL SUMMARY

AI & ML Engineering graduate with a strong foundation in data analytics, databases, and programming. Skilled in Python, Java, and SQL with hands-on experience in data preprocessing, machine learning concepts, and database management. Experienced in solving algorithmic problems and developing technical projects including IoT-based systems and web-integrated applications. Seeking opportunities in Data Analytics, Data Engineering, or Data Science to apply technical skills and build data-driven solutions.

ACADEMIC DETAILS

- B.Tech in CSE(AIML): **09/2024 – Present (Expected 2027)**
Sanjivani University, Kopergaon
- Diploma in Mechatronics Engineering: **78.67% (2021-2024)**
Guru Gobind Singh Polytechnic, Nashik

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Core CS:** Data Structures & Algorithms, Database Management Systems (DBMS)
- **Data & AI/ML:** Data Preprocessing, Machine Learning Basics, Data Analysis
- **Databases:** SQL (Oracle SQL), Database Design, Normalization, Transaction Management
- **Cloud & Platforms:** IBM Cloud, Watsonx.ai Studio
- **Data Visualization:** PowerBI

PROJECTS

1. Designed an AI Agent for Sanjivani University:

- **Objective:** Develop a WhatsApp-based AI assistant for Sanjivani University to provide instant information about admissions, courses, fees, and campus facilities.
- **Technologies Used:** ChatGPT (LLM), n8n workflow automation, Twilio WhatsApp API, and Google Search integration.
- **Application/Integration:** Integrated WhatsApp messaging with automated workflows to respond to student and parent queries, improving communication efficiency.

2. Designed a Crop Recommendation System (IBM Cloud):

- **Objective:** Develop a machine learning–based crop recommendation system to suggest suitable crops using soil nutrients (N, P, K), temperature, humidity, rainfall, and soil pH data.
- **Technologies Used:** IBM Cloud, IBM Data Refinery, Watsonx.ai Studio, and Machine Learning algorithms.
- **Application/Integration:** Performed data cleaning and preprocessing using IBM Data Refinery, then trained, deployed, and tested the model in Watsonx.ai Studio to generate crop recommendations.

INTERNSHIPS

AI & Cloud Intern

Edunet Foundation & AICTE (IBM SkillsBuild Virtual Internship)

Aug 2025 – Sep 2025

- **Roles and Responsibilities:** Worked with IBM Cloud and Watsonx.ai services to explore AI, cloud technologies, and machine learning solutions.
- **Work Details:** Built and evaluated machine learning models and AI agents, and developed a Crop Recommendation System using soil and climate data. Gained hands-on experience in prompt engineering, RAG-based solutions, and model deployment on Watsonx.ai Studio.

CERTIFICATES

- Predictive Modeling with IBM SPSS Modeler (IBM)
- Fundamental Algorithms: Design and Analysis (NPTEL)
- Software Engineering (NPTEL)
- Japanese Language Proficiency (JLPT) - N5

LANGUAGES

- **English:** Professional Proficiency
- **Hindi:** Native / Bilingual
- **Marathi:** Native / Bilingual
- **Japanese:** Basic Understanding
