

# Sumit Gorakshanath Shinde

Kopargaon, Maharashtra, India

shindesumit006@gmail.com — +91-9359464408 — GitHub — LinkedIn

## Professional Summary

AI and Data Science undergraduate with hands-on experience in Machine Learning, Computer Vision, and NLP-based automation systems. Skilled in developing end-to-end AI solutions including data preprocessing, model training, evaluation, and deployment using Python, TensorFlow, and Scikit-learn. Passionate about building intelligent systems for healthcare, analytics, and automation applications.

## Education

### Bachelor of Technology (AI & DS)

Sanjivani University, Maharashtra

Aug 2024 – May 2027

CGPA: 8.42/10

### Diploma in Computer Technology

Sanjivani K.B.P Polytechnic

Sep 2021 – May 2024

Percentage: 83.14%

## Technical Skills

**Programming:** Python, Java, SQL, C/C++

**Machine Learning:** Scikit-learn, TensorFlow, CNNs, YOLOv8, XGBoost, Model Evaluation

**Deep Learning:** Neural Networks, Transfer Learning, Object Detection, Image Classification

**Natural Language Processing:** NLP Pipelines, OCR, Resume Parsing, Text Processing

**Data Science:** Pandas, NumPy, Feature Engineering, Data Cleaning, EDA

**Visualization:** Matplotlib, Seaborn, Power BI, SPSS

**Deployment & APIs:** FastAPI, REST APIs, Firebase, Vercel

**Tools & Platforms:** Git, GitHub, Linux, Jupyter Notebook, Google Colab

**Databases:** MySQL, MongoDB, SQLite

## Internship Experience

### AI Intern – Ethara AI

Feb 2026 – Present

- Working on AI-driven applications involving machine learning and automation solutions.
- Assisting in data preprocessing, model training, and performance evaluation workflows.
- Collaborating on intelligent systems and deployment-focused AI applications.

### Data Science Intern – Tech Sonix

Feb 2025 – Mar 2025

- Preprocessed and analyzed 50k+ rows of structured datasets using Python and Pandas.
- Automated preprocessing pipelines reducing data cleaning time by 40%.
- Improved predictive accuracy by 15% through feature engineering and EDA.

## Projects

### AI Resume Analyzer & ATS Scoring System

NLP, OCR, FastAPI

- Developed an AI-powered resume screening system using NLP and OCR for ATS-based candidate scoring.
- Implemented semantic matching algorithms for resume-job description comparison and ranking.
- Built FastAPI APIs for scalable resume parsing and automated report generation workflows.

### AI-Based Food Calorie Estimation App

YOLOv8, CNN, TensorFlow

- Trained and optimized a YOLOv8-based deep learning model achieving 91% accuracy in food classification.
- Developed real-time inference pipelines and improved model generalization using feature optimization techniques.

### AI-Based Medical Report Generation System

Python, NLP, OCR

- Developed an automated medical report generation system using structured clinical inputs and NLP-based formatting.
- Reduced manual report preparation time by 60% through intelligent workflow automation.

### Customer Churn Prediction System

Python, XGBoost, Scikit-learn

- Developed a machine learning model for predicting customer churn using classification algorithms and feature engineering.
- Performed preprocessing, EDA, and model optimization for predictive analytics workflows.

## Certifications

- Python for Machine Learning
- DevOps Fundamentals – IBM
- Cloud Fundamentals – IBM
- Predictive Modeling with IBM SPSS
- Learning Analytics Tools – NPTEL
- MongoDB Introduction

## Languages

English (Professional), Hindi (Native), Marathi (Fluent), German (Elementary)
