

Tanishka Pangavhane

tanishkabpangavhane@gmail.com — +91 8263997611 — LinkedIn — GitHub

Summary

Computer Science Engineering student with hands-on experience in Generative AI, LLM fine-tuning, multi-agent AI systems, and backend development. Skilled in Python, Java, REST APIs, and AI workflow automation, with experience building enterprise-focused AI solutions for contract analysis, decision support, and intelligent automation. Familiar with cloud fundamentals, Git-based development workflows, and modern AI tools including ChatGPT and Hugging Face Transformers.

Education

B.Tech in Computer Science and Engineering Sanjivani University, Maharashtra	2024 - Present
Diploma in Computer Technology Sanjivani K.B.P. Polytechnic, Maharashtra	2021 – 2024
SSC (CBSE) Sanjivani Academy, Kopargaon, Maharashtra	2021

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Backend & Frameworks:** Flask, FastAPI, Spring Boot, React.js, REST APIs
- **AI / ML:** LLMs, Prompt Engineering, NLP, Transformer Models, Multi-Agent Systems, Model Fine-Tuning
- **Databases:** MongoDB, MySQL, SQLite, Firebase
- **Cloud & DevOps:** AWS, Docker, CI/CD Fundamentals
- **Libraries:** Hugging Face Transformers, spaCy, PyTorch
- **Tools & Version Control:** Git, GitHub, Git Workflows, Postman
- **Languages:** English, Japanese, Hindi, Marathi

Experience

Deep Learning Intern <i>NIT Kurukshetra</i>	May 2026 – Ongoing
• Building and optimizing CNN-based plant disease detection models while applying SHAP and LIME for explainable and interpretable AI solutions.	
LLM Post Training Intern <i>Ethara.AI</i>	Feb 2026 – May 2026
• Contributed to post-training and fine-tuning of multimodal LLMs, improving response accuracy and alignment	
Java Full Stack Intern <i>HCLTech</i>	June 2025 – Aug 2025
• Developed a web-based Order Management System with end-to-end CRUD functionality • Built backend services using Java and REST APIs for managing orders, customers, and inventory • Improved system efficiency through validation, error handling, and workflow optimization	

Web Developer Intern

June 2023 – July 2023

Smartpacey Institute and Technology Solution Pvt. Ltd., Chh. Sambhajinagar

- Developed responsive web interfaces using HTML, CSS, and JavaScript
- Collaborated on UI development aligned with user requirements

Projects

AI-Based Contract Analysis using Multi-Agent System

- Developed an AI-powered contract analysis platform using a multi-agent architecture for parallel legal document processing
- Implemented LLM-based agents for contract summarization, clause extraction, compliance validation, and risk assessment
- Built Flask-based APIs and workflow pipelines to automate contract review and support faster legal decision-making

Order Management System (Internship)

- Developed a full-stack system to manage orders, customers, and inventory workflows
- Implemented REST APIs and backend logic for efficient data handling
- Improved system usability through structured UI and validation mechanisms

AI Workflow Automation Assistant

- Built a GenAI-powered assistant using OpenAI APIs and prompt engineering techniques for automated content summarization and task assistance
- Integrated REST APIs and conversational workflows to improve productivity and user interaction
- Experimented with prompt optimization techniques for better contextual responses

AI Research & Knowledge Assistant (Multi-Agent RAG System)

- Built a multi-agent research assistant capable of planning, retrieving, analyzing, and synthesizing information from multiple sources.
- Implemented RAG pipelines and workflow orchestration for complex query handling.
- Developed specialized agents for search, summarization, fact-checking, and report generation.

Certifications

- Full Stack Java – HCLTech
- Java Fundamentals – Oracle Academy
- Spectra Vision Workshop – National Chung Cheng University, Taiwan
- Exploratory Data Analysis (Level 2 – AI Ready of AI ASCEND) – Accenture
- Introduction to Large Language Models (LLMs) – NPTEL
- Generative AI Fluency – FutureSkills Prime
