Professional Summary

Computer Science Engineering student passionate about Artificial Intelligence, Agentic AI Systems, and Intelligent Automation. Experienced in Large Language Models (LLMs), AI-powered applications, workflow automation, and web development. Skilled in designing AI-driven solutions that automate decision-making, enhance user experiences, and integrate seamlessly with modern software systems.

Technical Skills

- **Programming Languages:** Java, JavaScript, Python
- **Web Technologies:** HTML, CSS, Node.js, Spring Boot
- **AI & Machine Learning:** Large Language Models (LLMs), Prompt Engineering, Generative AI, Conversational AI
- **Agentic AI & Automation:** Agentic AI Systems, Intelligent Automation, AI Workflow Design
- **System Integration:** REST APIs, Workflow Orchestration, API Integration
- **Tools:** Git, GitHub, VS Code
- **Core Concepts:** Problem Solving, Software Development, AI Applications

Education

B.Tech in Computer Science and Engineering Sanjivani University, Kopergaon	2024–2027 CGPA: 8.24
Diploma in Computer Engineering Matoshri Institute of Technology, Yeola	2021–2024 89.40%
SSC Dr. C. M. Mehta Kanya Vidyalaya, Kopergaon	2021 89.80%

Internship Experience

LLM Intern – Ethara AI (Remote)	Feb 2026 – May 2026
• Worked on Large Language Model optimization and AI response improvement. • Explored prompt engineering and conversational AI techniques. • Contributed to AI-powered application development and workflow automation. • Assisted in evaluating and enhancing LLM performance.	
Software Development Intern – HCL Technologies (Remote)	May 2025 – Jun 2025
• Developed backend services and REST APIs. • Worked on database integration and application features. • Gained experience in software development workflows and deployment practices.	

Projects

AI Interview Communication Trainer

- Built an AI-powered interview preparation platform using Large Language Models (LLMs).
- Generated personalized interview questions based on user profile, skills, and job role.
- Provided AI-driven feedback on communication skills and answer quality.
- Integrated conversational AI workflows for realistic interview practice sessions.

Smart Resume Analyzer

- Developed an AI-based resume analysis system using LLM concepts.
- Extracted skills, keywords, and experience from resumes automatically.
- Generated resume improvement suggestions through prompt engineering.
- Calculated resume-job compatibility scores to assist job seekers.

AI Virtual Mouse

- Developed a gesture-controlled virtual mouse using Computer Vision and AI.
- Implemented real-time hand tracking through webcam input.
- Enabled cursor movement, clicking, and scrolling using hand gestures.
- Improved touchless human-computer interaction using intelligent gesture recognition.

Certifications

- Java Fundamentals – Oracle Academy
- Fundamentals of IoT – Sanjivani University
- NPTEL-Large Language Models
- Agentic AI and Intelligent Automation (Self Learning)

Areas of Interest

Agentic AI, Intelligent Automation, Large Language Models (LLMs), Generative AI, Workflow Orchestration, AI Engineering, Software Development, Emerging Technologies.
