SUMMARY

AI/ML engineer with practical experience in computer vision, deep learning, and LLM systems, building CNN-based models, medical image segmentation pipelines, and AI-powered applications using Python, TensorFlow, PyTorch, and OpenCV.

TECHNICAL SKILL

- **Languages:** Java, Python, HTML, CSS, JS, PHP
- **Frameworks:** TensorFlow, PyTorch, OpenCV, HuggingFace
- **Tools:** git, GitHub, Docker, Jenkins , PowerBi ,Postman
- **AI / ML:** Deep Learning, CNN, Computer Vision, RAG, NLP
- **Database:** MySQL, MongoDB
- **Cloud:** AWS , GCP , IBM
- **OS:** Windows, Ubuntu Linux

PROJECTS

1. Prostate Cancer Detection

- Built a U-Net model for medical image segmentation and AI-based diagnostic reporting.
- Developed a FastAPI backend with a React interface for real-time predictions.
- Focused on data pre-processing and model optimization for healthcare analytics.

2. Legal Agent using RAG

- Developed a Legal AI Assistant using RAG for accurate, document-based legal question answering.
- Implemented document retrieval and vector search for relevant legal information.
- Generated context-aware responses using an LLM, reducing hallucinations.

3. Jarvis – AI Virtual Assistant

- Built an interactive voice- and text-enabled assistant with speech recognition, text-to-speech, and NLP.
- Integrated APIs for real-time search, image generation, and web automation (Google/YouTube/system tasks).
- Designed a PyQt5-based GUI with multithreading for a smooth and responsive user experience.

INTERSHIPS

1.Ethara AI (Green Rider Technology LLP)

Feb 2026- April 2026

- Improved LLM performance using RLHF and supervised fine-tuning techniques
- Worked on data annotation, curation, and model evaluation to enhance accuracy
- Applied prompt engineering to improve context-aware AI responses
- Collaborated on dataset development for real-world LLM applications

2.TechnoGrowth Software Solution Pvt.Ltd

Jan 2024- Feb 2024

- Developed and maintained web applications with a focus on responsiveness and cross-browser compatibility.
- Collaborated with cross-functional teams to design, develop, and implement new features.
- Utilized HTML, CSS, JavaScript, PHP, and MySQL to build and enhance dynamic web applications.

3.ApexPlanet Software Pvt.Ltd

Mar 2023 - Dec 2023

- Implemented form validation, dynamic content updates, and DOM manipulation.
- Designed mobile-friendly layouts using Flexbox, CSS Grid, and media queries.
- Integrated public APIs to fetch and display real-time data.
- Developed portfolio and e-commerce style pages with filtering, sorting, and local storage.

EDUCATION

B.Tech (AIML)- (2024) Pursuing

Sanjivani University, Kopargaon

CGPA - 7.6 (Current)

Diploma - (2023)

Sanjivani K. B. P. Polytechnic, Kopargaon.

Percentage – 79.20

ACHIEVEMENT

- Shortlisted in **aOS Global Buildathon (Hackerrank, 2024)** – Selected among top 2806 teams for innovative project development in a global hackathon.

CERTIFICATIONS

- IBM DevOps and Cloud Fundamentals
- IBM WATSON Studio
- Predictive Modeling with IBM SPSS Modeler
- Google Cybersecurity
