SUMMARY

I am Anshuman Gaikwad, a dedicated and enthusiastic undergraduate B.Tech student at Sanjivani University, currently pursuing a degree in technology. With a strong foundation in coding, data engineering, and data analytics, I am skilled in designing and managing data solutions, and deriving valuable insights from complex datasets. My academic background and hands-on experience have honed my problem-solving skills, analytical thinking, and attention to detail. Passionate about technology and data-driven innovation.

SKILLS

Data Science Pandas, NumPy, Data Cleaning
Visualization Matplotlib, Seaborn, Power BI, COGNOS BI, SPSS
Tools & Platforms Jupyter, Google Colab, Git, Docker, VS code
Programming Languages Python
Web Development HTML, CSS, java script, Bootstrap, PHP, MySQL

EDUCATION

B. Tech in Artificial Intelligence and Data Science , Sanjivani University (GPA: 8)	Oct '24 — Present Kopargaon, India
Diploma in Computer Engineering , MIT Rotegeon (GPA: 81.66)	Jan '21 — Jan '24 Rotegeon, India

PROJECTS

Design and Development of IoT based Smart Blind Stick

- Developed an IoT-based Smart Blind Stick using ESP32, ultrasonic sensor, buzzer, push buttons, and PCB board to provide early obstacle detection and multi-sensory alerts for visually impaired users.
- Integrated Flutter mobile application, Firebase, Twilio calling feature, and Arduino IDE to create a user-friendly, lightweight, and smart assistive navigation system that enhances mobility and independence.

Study Swap - A Campus Market Place

- Developed “Study Swap – A Campus Marketplace” to provide affordable stationery and study material solutions for students while reducing waste through reuse and exchange of items.
- Promoted sustainability practices, student collaboration, and easy accessibility of academic resources through a simple and user-friendly campus marketplace platform.

Uber Rides Data Analysis - Python (Data Analytics)

- Performed data cleaning and exploratory data analysis (EDA) on Uber ride datasets using Python to identify trends, patterns, and improve data quality.
- Created visualizations and analytical insights that enhanced understanding of ride behavior, reduced data noise, and improved reporting clarity.

Python Voice Assistant

- Developed a Python-based Voice Assistant capable of performing 15+ automated tasks such as opening applications, searching information, and executing voice commands.
- Improved user interaction efficiency and reduced manual operations by integrating speech recognition, voice response, and smart automation features.

EXPERIENCE

Google Cloud Generative AI

SmartBridge & SmartInternz

Jun '25 — Jul '25
Hyderabad, India (Remote)

- I completed a NASSCOM Virtual Internship on Google Cloud Generative AI from 11 June 2025 to 28 July 2025, where I learned the basics of Generative AI and cloud computing. I worked with Google Cloud tools to understand how AI models generate text and data, practiced prompt usage, and explored real-world applications of Generative AI. This internship helped me build a clear understanding of AI concepts and improve my technical and problem-solving skills.

CERTIFICATIONS

DevOps Fundamentals, IBM
