Database Management: Firebase, MongoDB

Deployment: GitHub, Vercel, Render

Programming Languages: C, C++, Java, Python, Dart

Soft Skills: Problem Solving, Quick Learning, Team Management, Leadership

Languages: English, Hindi, Marathi, German

PROJECTS

Designing and Developing a Web Application for the MSRTC Bus Pass System, MSRTC

Mar '24
Ahilyanagar, India

- Reduces paperwork and manual processing
- Digital bus pass generation and download
- User registration and secure login
- Admin dashboard for verification and approval

GenVista: AI Image & Prompt Explorer, Self

Aug '24 — Sep '24
Ahilyanagar, India

- Built a small web application to showcase AI-generated images with their prompts.
- Displayed images along with basic prompt details for easy understanding.
- Static or limited dynamic data handling suitable for a mini project.
- Focused on learning fundamentals of frontend, backend, and basic API integration.

AIDOC: AI Doctor ChatBot, Self

Jan '25 — Feb '25
Kopergaon, India

- Developed an AI-based healthcare chatbot for symptom analysis and disease prediction
- Implemented NLP techniques to process and understand user inputs
- Trained machine learning models on medical datasets for accurate predictions
- Designed a real-time, user-friendly chat interface with 24/7 accessibility
- Integrated features for basic treatment suggestions and precaution recommendations

Smart Irrigation System Using IoT and Automation, Self

Mar '25 — Apr '25
Kopergaon, India

- Automated irrigation based on soil moisture and environmental data
- Uses IoT sensors for real-time monitoring

- Reduces water wastage and improves efficiency
- Remote monitoring and control via web/mobile interface

Personal Portfolio Web Platform with Custom CMS Backend, Self

Jul '25 — Aug '25
Kopargaon, India

- Built a full-stack portfolio web application with a dynamic user interface and a secure admin panel.
- Developed a private, password-protected dashboard to manage projects, skills, and personal details using full CRUD operations.
- Created RESTful APIs with Spring Boot to enable smooth communication between the frontend and the database.

SmartLabTracker: Digital Maintenance Logbook for Labs, Team

Sep '25 — Nov '25
Kopargaon, India

- Developed a QR-based digital maintenance system for lab equipment tracking
- Built role-based dashboards (Admin, HOD, Faculty, Student) for controlled access and management
- Designed real-time maintenance logging system with complete history tracking
- Integrated JWT authentication & Spring Security for secure user access
- Enabled PDF report generation for audits and maintenance records

InterviewX: AI-Based Interview Preparation System, Team

Jan '26 — Mar '26
Kopargaon, India

- Improve interview preparation through AI-based practice
- Enhance communication skills and build confidence
- Provide personalized questions based on user skills
- Deliver real-time feedback and performance analysis
- Track user performance and automate interview process

EXPERIENCE

Full Stack Web Developer

Jun '23 — Jul '23

ProAzure Software Solutions Pvt.Ltd.

Ahilyanagar, India (Remote)

As a Full Stack Web Developer at ProAzure Software Solutions Pvt. Ltd., responsible for designing, developing, and maintaining end-to-end web applications by working on both frontend and backend technologies, building RESTful APIs, integrating databases, ensuring application performance and security, and collaborating with cross-functional teams to deliver scalable and reliable software solutions.

Full Stack Web Developer

Jun '25 — Aug '25

HCLTech

kopergaon (Remote)

As a Full Stack Web Developer at HCLTech, I gained hands-on experience in designing, developing, and deploying full-stack web applications. I worked on creating responsive frontends using modern web technologies, developing secure backend services, and integrating databases and RESTful APIs. I collaborated with cross-functional teams to gather requirements, implement efficient solutions, optimize application performance, and follow best practices for code quality, security, and scalability, gaining practical industry-level exposure to real-world software development.

AWARDS

Industry Hackthon

Jan '25

Developed an AI-based virtual doctor for preliminary health assessment
Allows users to input symptoms and receive possible disease predictions
Provides basic medical advice and precautionary measures

CERTIFICATIONS

HTML, CSS, and JavaScript: Building the Web

Web Design and Development

MongoDB

Web Development, RPA and Android Development"
