

# SHREYAS HON

AI & Machine Learning Engineer

+91 7559166967 | [shreyashhon1111@gmail.com](mailto:shreyashhon1111@gmail.com) | Kopargaon, Maharashtra, India | [linkedin.com/in/shreyas-hon](https://linkedin.com/in/shreyas-hon)  
| [github.com/shreyashhon1111](https://github.com/shreyashhon1111)

AI & Machine Learning Engineer with a focus on **Large Language Model (LLM) alignment, fine-tuning, and production optimization**. Currently implementing **RLHF** and advanced prompt engineering at **Ethara.ai** to improve model accuracy and alignment at scale. Combines a rare multidisciplinary foundation in **Mechatronics** and **Computer Science (AIML)** to build autonomous, real-world AI solutions. Hands-on expertise in **PyTorch**, **IBM Watson Studio**, **Scikit-learn**, and cloud-based ML pipelines on **AWS** and **GCP**.

## PROFESSIONAL EXPERIENCE

**LLM Training Intern (Paid) | Ethara.ai** Feb 2026 – Present

- Fine-tuned production-grade Large Language Models (LLMs) using **Reinforcement Learning from Human Feedback (RLHF)**, improving model response alignment and reducing hallucination rates across multiple evaluation benchmarks.
- Engineered and curated high-quality annotated datasets for supervised fine-tuning (SFT) and preference ranking, directly enhancing model output quality for deployment in high-accuracy production environments.
- Designed and iterated on **systematic prompt engineering** frameworks to optimize instruction-following behavior, measurably increasing task-specific accuracy.
- Evaluated model outputs against human preference criteria, identified systematic failure modes, and provided structured feedback to accelerate iterative model improvement cycles.

**Machine Learning Intern | Codec Technology** Aug 2025 – Sep 2025

- Built and validated **supervised predictive models** using Scikit-learn, delivering automated data analysis pipelines that reduced manual processing time by streamlining end-to-end workflows.
- Designed and optimized **data preprocessing and feature engineering pipelines** for structured datasets, improving downstream model accuracy across multiple ML algorithms including regression, classification, and ensemble methods.
- Performed exploratory data analysis (EDA) using Pandas and Matplotlib to surface actionable insights and guide feature selection decisions.

**Diploma Trainee — Production Engineering | O/E/N India Ltd** Dec 2023 – Mar 2024

- Managed quality control and statistical process monitoring for **electronic component manufacturing**, ensuring adherence to production tolerances and ISO quality standards.
- Authored and maintained **technical documentation** covering industrial workflows, component specifications, and standard operating procedures, improving knowledge transfer within the production team.

## TECHNICAL SKILLS

|                                |                                                                                                             |
|--------------------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages</b>   | Python, Java, C++, C, SQL                                                                                   |
| <b>AI &amp; Deep Learning</b>  | Large Language Models (LLMs), RLHF, NLP, Computer Vision, Prompt Engineering, Deep Learning, PyTorch, Keras |
| <b>ML &amp; Data Science</b>   | Scikit-learn, Pandas, NumPy, Matplotlib, SciPy, R                                                           |
| <b>Enterprise AI Platforms</b> | IBM Watson Studio, IBM SPSS Modeler                                                                         |
| <b>Cloud &amp; DevOps</b>      | AWS, Google Cloud Platform (GCP), Docker, Jenkins, CI/CD Pipelines                                          |
| <b>Web Development</b>         | HTML, CSS, JavaScript, PHP, Bootstrap, Git/GitHub                                                           |
| <b>Databases</b>               | MySQL                                                                                                       |
| <b>AI Productivity</b>         | ChatGPT, GitHub Copilot, Gemini, DeepSeek, Perplexity, n8n, UiPath                                          |

## PROJECTS

**Smart Energy Harvesting System for Rural Roads** | *Developer & Researcher*

- Engineered an **IoT-based piezoelectric energy harvesting system** that converts mechanical energy from vehicular traffic into usable electrical power, targeting off-grid rural road infrastructure.

- Designed sensor array placement logic and real-time data acquisition pipeline, enabling continuous energy monitoring and output measurement across variable traffic loads.
- Prototyped and validated the system using embedded microcontrollers, demonstrating consistent power generation under simulated road conditions.

**Autonomous Human-Following Robot** | *Mechatronics Engineer*

- Built a **mechatronics-driven autonomous robot** capable of real-time human detection and tracking using computer vision and embedded control systems.
- Implemented sensor fusion and closed-loop control algorithms enabling smooth, latency-tolerant person-following behavior in dynamic environments.

**Car Resale Price Prediction Model** | *ML Developer*

- Developed a **Linear Regression predictive model** to estimate used car resale prices using real-world datasets curated for the Indian automotive market.
- Performed end-to-end **data preprocessing, outlier detection, and feature engineering** using Pandas and Scikit-learn, improving model  $R^2$  score through iterative feature selection and normalization.

**EDUCATION**

---

**B.Tech in Computer Science Engineering (AIML)**

*Sanjivani University, Kopargaon*

2024 – 2027

Sem 5 CGPA: 7.12 / 10.0

**Diploma in Mechatronics Engineering**

*Sanjivani K.B.P. Polytechnic, Kopargaon*

2021 – 2024

MSBTE Score: 75.19%

**CERTIFICATIONS & WORKSHOPS**

---

**Certifications**

IBM Watson Studio  
IBM SPSS Modeler  
Accenture AI: Exploratory Data Analysis  
IBM Data Analysis with Python  
IBM Cloud Fundamentals  
IBM DevOps & Software Engineering Fundamentals  
Microsoft Power BI

**Workshops & Events**

AI Automation — n8n & UiPath  
Python for Scientific Computing (FOSSEE, IIT Bombay)  
DevFest 2025 (Google Developer Student Clubs)  
Generative AI on AWS (Amazon Web Services)

**ACHIEVEMENTS & ADDITIONAL INFORMATION**

---

- **Multidisciplinary AI Foundation:** Unique combination of Mechatronics Engineering and Computer Science (AIML) enables cross-domain application of AI to physical systems, robotics, and industrial automation — a profile highly relevant to embodied AI and edge-deployment roles.
- **Early Industry Exposure:** Secured a **paid LLM Training Internship** at Ethara.ai during the second year of B.Tech, demonstrating strong practical skills and professional readiness ahead of peers.
- **Workshops & Community:** Active participant in Google DevFest 2025, AWS Generative AI workshop, and IIT Bombay’s FOSSEE Python program, reflecting commitment to continuous learning and the open-source AI ecosystem.
- **Languages:** English (Fluent), Hindi (Fluent), Marathi (Fluent), German (Basic)
