CAREER OBJECTIVE

Final-year B.Tech student in AI & ML with proven experience building and delivering automated workflow systems, working directly with clients, and using AI tools in production environments. Hands-on with automation platforms, LLM-powered applications, and business process optimization through internships across AI evaluation, Zoho-based automation, and agentic AI development. Strong communicator with an ownership mindset and comfort working in fast-paced startup environments. Seeking an AI Operations or automation-focused role to build and improve AI-powered internal systems.

EXPERIENCE

LLM Post-Training Intern

Jan 2026 – May 2026

Ethara AI

Gurugram, India (Remote)

- Worked hands-on with AI platforms (GPT-based and Claude-style models) across client-based evaluation projects, assessing LLM output quality using structured rubrics and maintaining strict productivity benchmarks.
- Conducted prompt evaluation, response validation, and structured reasoning analysis – developing strong working knowledge of how AI platforms behave in real operational workflows.
- Contributed to evaluation consistency improvements through structured documentation and feedback, working effectively in a fully remote, fast-paced AI environment.

Business Analyst Intern | Zoho Developer & Automation Specialist

Nov 2025 – Apr 2026

Sai Mithra LLC

Remote

- Built end-to-end automated reporting and workflow systems using Zoho Creator, Zoho Analytics, and Zoho CRM for 8+ team members – reducing manual coordination effort by 70% and directly improving operational efficiency.
- Designed and deployed a custom data collection and feedback application, eliminating manual entry and improving data accuracy across client operations – demonstrating hands-on CRM and workflow automation delivery.
- Worked directly with 2+ clients to gather requirements, prototype automation solutions, and deliver operational improvements – gaining practical experience in the full automation delivery lifecycle.

Exchange Student | International Hackathon Participant

Jul 2025 – Aug 2025

Ural Federal University

Ekaterinburg, Russia

- Selected to represent Sanjivani University at the Summer University Exchange Program; competed in HackAtom, a 24-hour international hackathon, building and presenting a full working prototype to an international panel.
- Demonstrated the ability to build fast under ambiguity, coordinate across teams, and deliver results in a high-pressure, time-constrained environment – directly aligned with fast-paced startup work culture.

Customer Service Associate

Jun 2023 – Jan 2024

Amazon Development Centre India Pvt. Ltd.

Mumbai, India

- Managed high-volume operational workflows with consistent quality and accuracy, maintaining strong KPIs across productivity, satisfaction, and resolution metrics in a large-scale professional environment.
- Adapted quickly to internal tools and systems at scale, demonstrating fast learning, reliability, and stakeholder coordination in a structured operational setting.

PROJECTS

Nyay-AI – AI Based Legal Document Analysis & Guidance System | *Python, HTML, CSS, JavaScript* 2025

- Co-developed an AI-powered legal document analysis system that summarises, interprets, and drafts legal documents in plain language with multilingual, voice, and PDF support – registered under Copyright Office, Government of India.
- Built end-to-end AI-driven document workflows integrating LLM-based text analysis, multilingual output, and PDF processing – demonstrating practical ability to build operational AI tools that serve real user needs.
- **Copyright Certificate No. SW-2026022947** | Application No. SW-45302/2025-CO | Filed: 05/11/2025 | ROC: 29/05/2026

Deepfake Detection System | *Python, PyTorch, MediaPipe, FastAPI, Streamlit*

2025

- Prototyped and shipped an AI-based media verification pipeline end-to-end – PyTorch model, FastAPI backend, Streamlit UI – with documented code and architecture throughout. [\[GitHub\]](#)

Multilingual Translator & Summariser | *Python, FastAPI, NLTK, PyMuPDF, gTTS, SQLite*

2025

- Contributed to a Document AI and NLP application supporting 58 languages with PDF/DOCX translation, document summarisation, and multilingual voice output – shipped with a FastAPI backend and zero cloud-API dependency. [\[GitHub\]](#)

Skin Cancer Classification System | *Python, PyTorch, Streamlit, OpenCV*

2025

- Built a deep learning image classification prototype for medical imaging, with confidence scores and heatmap visualisations for model interpretability – making AI outputs accessible to non-technical reviewers. [\[GitHub\]](#)

EDUCATION

Sanjivani University

Bachelor of Technology – CSE with AI & ML Specialization | CGPA: 8.14/10

Kopargaon, Maharashtra

Aug 2024 – Aug 2027

Sandip Foundation

Diploma in Civil Engineering | 79% (Lateral Entry)

Nashik, Maharashtra

2016 – 2020

TECHNICAL SKILLS

AI Automation & Workflow: Zoho Creator, Zoho CRM, Zoho Analytics, N8N, Make.com, Zapier (familiar), WhatsApp API, LLM APIs, Agentic AI

AI / GenAI: Generative AI, LLM Evaluation, Prompt Engineering, NLP, Computer Vision, Deep Learning, Document AI, RLHF/SFT

Languages: Python, JavaScript, HTML5, CSS3, Java, SQL

Frameworks & Libraries: FastAPI, React, TailwindCSS, PyTorch, TensorFlow/Keras, OpenCV, MediaPipe, Scikit-learn, NLTK, PyMuPDF, Pandas, NumPy, Streamlit

Platforms & Tools: Git, GitHub, Google Colab, VS Code, IBM Watsonx, IBM SPSS, Power BI

Databases: MySQL, MongoDB, SQLite

COPYRIGHT & INTELLECTUAL PROPERTY

Nyay-AI: AI Based Legal Document Analysis and Guidance System

Filed: 05/11/2025

- Certificate No. SW-2026022947 | Application No. SW-45302/2025-CO | ROC Date: 29/05/2026
- Registered under Copyright Office, Government of India. Co-author: Vaishnavi Nitin Nikumbh & Vansh Nilesh Badjate.

ACHIEVEMENTS & ACTIVITIES

International Hackathon – HackAtom 2025, Ural Federal University, Russia (built Isotope Nexus in 24 hours, presented to international panel)

Gold Medal – AI Innovation Expo 2026, IBM / CareerTiQ (Project: SafeVision, team contribution)

National Hackathon – SUNHACKS 2025, Sandip University, Nashik

State-Level Competition – Dipex 2025, selected to idea presentation round

Event Coordinator – AIML Department Student Association (ADSA), Sanjivani University (2024–2025)

Workshop – Spectra Vision: Hyperspectral Imaging, National Chung Cheng University, Taiwan (1 week)
