Objective

- Aspiring AI and Data Science Engineer skilled in Python, Machine Learning, Deep Learning, Data Analytics, and Generative AI. Experienced in developing AI-powered applications, predictive models, and analytics solutions, with a strong interest in Computer Vision, LLMs, and real-world AI deployment.

Internship

- **Ethara AI** April 2026 – May 2026
LLM Post Training Intern Remote (Paid)
 - Contributed to AI and data projects supporting Large Language Model (LLM) post-training workflows.
 - Performed AI data preparation, annotation, evaluation, and quality assurance tasks to improve model performance and reliability.
 - Gained practical exposure to real-world AI workflow execution and LLM development pipelines.
- **SmartInternz (Google Cloud & NASSCOM)** Jun 2025 – Jul 2025
Generative AI Virtual Internship Remote (Paid)
 - Completed hands-on training in Generative AI, Prompt Engineering, Foundation Models, and Google Cloud AI services.

Education

- **Sanjivani University** 2024 – 2027
B.Tech in Artificial Intelligence and Data Science Kopargaon, Maharashtra
- **Sanjivani K.B.P. Polytechnic** 2021 – 2024
Diploma in Mechatronics Engineering – 88.89% Kopargaon, Maharashtra
- **Sant Janardhan Swami School** 2020 – 2021
CBSE 10th – 70.20% Kokamthan, Maharashtra

Projects

- **AI-Powered RAG Knowledge Assistant**
Python, Gemini API, FAISS, LangChain, Streamlit
 - Built and deployed a multi-PDF Retrieval-Augmented Generation (RAG) assistant that enables users to upload documents and interact with them through natural language queries.
 - Implemented PDF text extraction, document chunking, vector embeddings, FAISS-based semantic search, and Gemini-powered context-aware answer generation.
 - Developed Single-PDF and Multi-PDF retrieval modes, document comparison, source attribution, chat export (PDF/DOCX), and an interactive Streamlit interface.
 - Optimized retrieval pipelines using metadata filtering and document-level search strategies to improve answer relevance across multiple uploaded documents.
- **AI-Powered Binance Futures Trading Dashboard** (Ongoing)
Python, Streamlit, Binance API, Plotly, Pandas
 - Developed a real-time cryptocurrency trading dashboard integrated with Binance Futures Testnet for market and limit order execution.
 - Built AI-assisted trading signals using RSI and EMA indicators with confidence-based BUY/SELL/HOLD recommendations and interactive market analytics dashboards.
- **Healthcare Readmission Prediction System**
Python, Scikit-Learn, FastAPI, Power BI
 - Developed machine learning models to predict 30-day hospital readmission risk using healthcare datasets.
 - Built an end-to-end analytics pipeline and deployed prediction services through FastAPI with Power BI dashboards for visualization and decision support.

• **AI-Powered Interactive Learning System**

Gemini Vision API, Flask, Computer Vision

- Developed a Generative AI-powered learning assistant using Gemini Vision API for real-time image understanding and audio-based responses.
- Designed an interactive, screen-free audio learning aid to support early learners and students with dyslexia.

Technical Skills

- **Programming:** Python, SQL, C/C++
- **Machine Learning:** Scikit-Learn, PyTorch, Keras, CNNs, Classification, Regression, Model Evaluation
- **Generative AI & LLMs:** Gemini API, Prompt Engineering, LLM Applications, Conversational AI, AI Agents, LLM Evaluation, Function Calling
- **Retrieval-Augmented Generation (RAG):** Embeddings, Vector Search, Document Retrieval, Context-Aware Generation
- **Data Analytics:** Pandas, NumPy, Power BI, MS Excel, Data Visualization
- **Frameworks & Backend:** FastAPI, Flask, Streamlit, REST APIs
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, MySQL, Google Cloud
- **Concepts:** Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI

Achievements & Activities

- **Bharat Bodhan AI Conclave** Feb 2026
National-Level AI Project Exhibition *New Delhi*
 - Selected to exhibit the AI-Powered Interactive Learning System before industry professionals, researchers, and academic leaders.
- **Spectra Vision Workshop** 2024
National Chung Cheng University, Taiwan *Sanjivani University*
 - Applied Hyperspectral Imaging, PCA, and ResNet50 techniques on bladder cancer datasets for medical image analysis.
