PROFILE SUMMARY

Computer Science and Engineering student with interest in Full Stack Development, AI, LLMs, and Web Development. Skilled in Java, Python, HTML, CSS, React, and backend development. Passionate about building real-world applications, APIs, and AI-based solutions while improving problem-solving and development skills.

EDUCATION

B.Tech in Computer Science and Engineering Sanjivani University kopargaoan,Maharashtra	2024 - 2027
B.Tech in Computer Engineering Matroshri Institute of Technology Dhanore-yeola	2021 - 2024
SSC Swami Muktanand English Medium School,Yeola	2007 - 2021

TECHNICAL SKILLS

Programming Languages : Java, Python, C, C++, JavaScript
Frontend Technologies : HTML, CSS, React.js, Angular
Backend Technologies : Node.js, Spring Boot, REST APIs
AI / ML : Generative AI, LLM, RAG, Prompt Engineering, Deep Learning, pandas, NumPy
Databases : MySQL, MongoDB, PostgreSQL
Tools : Git, VS Code, GitHub, Postman, CI/CD Pipelines
Concepts : OOPs, DSA, MVC Architecture, WebSockets
Language : English, Hindi, Marathi, German

PROJECTS

IoT-Based Smart Dustbin System

- Developed a smart dustbin using Arduino, ultrasonic sensors, and a servo motor for automated lid operation.
- Implemented motion detection to automatically open the lid when a user approaches.
- Integrated waste-level monitoring to detect when the dustbin is full.
- Enabled IoT-based alerts and notifications for efficient waste management and maintenance.

Smart CNG Online Booking System (CNG ASSURE)

- Developed a web-based platform for real-time CNG availability checking and online slot booking.
- Implemented user registration, secure login, booking management, and admin dashboard features.
- Reduced waiting time and improved customer experience through advance booking functionality.
- Designed an organized system to manage station crowd efficiently and provide transparent booking updates.

DigiFarm – Digital Farm Management Portal

- Developed a smart farm management system using AI and IoT for pig and poultry farms.
 - Implemented real-time monitoring of animal health and farm conditions to reduce disease risks.
 - Designed digital record management and alert systems for efficient farm operations.
 - Integrated communication features to connect farmers with veterinary officers for expert guidance.
-

INTERNSHIPS

Full Stack Web Developer Intern

July 2023 – August 2023

Atjoin Pvt. Ltd

Worked on web development projects using frontend technologies such as HTML, CSS, and JavaScript. Assisted in developing responsive web pages, improving website functionality, and supporting backend integration while collaborating with the development team on real-world projects.

Full Stack Java Intern

June 2025 – August 2025

HCLTech

Participated in the Industry Internship Project in Full Stack Java conducted by HCLTech. Gained hands-on experience in frontend and backend development, RESTful APIs, database integration, and full-stack application development while working on real-world industry projects.

AI / LLM Automation Intern

February 2025 – May 2025

Ethara.AI

Worked on AI, LLM, and automation-based tasks and projects. Gained hands-on experience with prompt engineering, chatbot workflows, and AI tools. Assisted in developing and testing automation processes and AI-driven solutions. Improved practical understanding of LLM integrations and real-world AI applications.

CERTIFICATIONS

- **NPTEL** – Introduction to Large Language Models (LLMs) (Jul–Oct 2025)
 - **Infosys Springboard** – AWS Certified Developer Associate
 - **Infosys Springboard** – Certification Course Completion
 - **Microsoft** – Get Started with AI Agent Development on Azure (April 2026)
 - **TalentBattle** – MongoDB Certification (April 2026)
 - **TalentBattle** – IoT – Internet of Things Certification (May 2026)
 - **Oracle Certified** –OCI Generative AI
-
