PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG). Skilled in developing AI-powered applications including recommendation systems, document intelligence platforms, and chatbots. Proficient in Python, SQL, TensorFlow, Scikit-learn, LangChain, Streamlit, and Git. Strong understanding of data preprocessing, model training, prompt engineering, and AI deployment. Passionate about building scalable AI solutions and solving real-world problems using data-driven approaches.

PROFESSIONAL EXPERIENCE

Full Stack Development Intern | [Sumago Infotech Pvt. Ltd.](#) June 2023 – July 2023

- Completed 6 weeks of industrial training under the SCOPE program.
- Worked on frontend and backend development concepts using web technologies.
- Developed responsive web pages and integrated backend functionalities.
- Gained practical experience in database connectivity and CRUD operations.
- Collaborated with mentors and team members on project-based learning activities.
- Improved understanding of software development lifecycle and real-world application development.

LLM Post-Training Intern | [Ethara AI](#) Feb 2026 – May 2026

- Completed a paid internship focused on Large Language Model (LLM) post-training workflows, contributing to human-aligned data quality improvement.
- Performed data preparation, annotation, and evaluation tasks adhering to real-world AI industry standards and best practices.
- Conducted prompt evaluation and developed deeper understanding of LLM systems, alignment techniques, and model behaviour assessment.
- Collaborated on cross-functional team projects, enhancing understanding of end-to-end AI development pipelines.

ACADEMIC CREDENTIALS

B.Tech – Artificial Intelligence & Data Science | 2024 – 2027

Sanjivani University | [CGPA: 8.14 / 10.0](#)

Diploma – Computer Technology Engineering 2021 – 2024

Sanjivani K.B.P Polytechnic | [Percentage: 86.26%](#)

PROJECTS

AI Personal Fashion Stylist / Jan 2025 – May 2025

AI- Powered Fashion Recommendation System | Python, Machine Learning, Computer Vision, Streamlit

- Designed and developed an AI-based fashion recommendation system to provide personalized outfit suggestions based on user preferences and style choices.
- Implemented machine learning algorithms to analyze fashion trends, clothing attributes, and user behavior for accurate recommendations.
- Integrated image processing techniques to identify clothing items and improve outfit matching.
- Developed an interactive user interface using Streamlit, enabling users to receive real-time fashion suggestions.
- Enhanced user experience by providing personalized styling recommendations based on occasion, season, and color preferences.

AIML LLM RAG System / Jun 2026 – Present

AI-Powered Retrieval-Augmented Generation (RAG) System | Python, LLM, RAG, Document Retrieval, Database Integration

- Developed a Retrieval-Augmented Generation (RAG) system capable of processing 500+ PDF and DOCX documents.

- Implemented document chunking, embedding generation, and semantic retrieval pipelines.
- Integrated Large Language Models (LLMs) to generate context-aware responses.
- Reduced document retrieval latency by approximately 40%.
- Built scalable document ingestion and knowledge retrieval architecture.
- Developed an interactive Streamlit-based user interface.

AI Chatbot Application / Jun 2026 – Present

C#, Windows Forms, .NET Framework

- Developed a desktop-based AI chatbot application for interactive user communication.
- Designed and implemented a user-friendly graphical interface using Windows Forms.
- Created conversational response mechanisms to simulate intelligent interactions.
- Applied object-oriented programming and event-driven concepts for structured development.
- Tested and optimized the application to ensure smooth performance and efficient message handling.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C#, Java

AI/ML: Machine Learning, Deep Learning, Neural Networks, CNN, Computer Vision, Natural Language Processing (NLP), Model Training, Model Evaluation, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA)

Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, LangChain, AI Chatbots, Document Intelligence Systems

Frameworks & Libraries: TensorFlow, Scikit-learn, Streamlit, Flask

Frontend Development: HTML, CSS, Streamlit

Backend Development: Flask, REST APIs, CRUD Operations

Database Technologies: MySQL, SQLite, Database Integration

Data Analytics & Visualization: Pandas, NumPy, Power BI, Data Visualization

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

- IBM Cognos Analytics Certification (2025)
- IBM Business Intelligence Certification
- IBM Cloud Fundamentals Certification
- IBM DevOps Fundamentals Certification
- Power BI Workshop Certificate
